Doris Busbee	Louise Pitts	Ann Tennon	Annette Shirah

The largest radio receiver on earth is in New Mexico. Pilots call it “the mushroom patch.” Its real name is the Very Large Array. The “VLA” is a series of huge satellite disks on thirty-eight miles of railways. Together the discs mimic a single telescope the size of Washington, D.C. Astronomers come from all over the world to analyze the images of the heavens composed by the VLA from the radio signals it receives from space. Why is such a giant apparatus needed? Because the radio waves, often emitted from sources million of light years away, are very faint. The total energy of all radio waves ever recorded barely equals the force of a single snowflake hitting the ground. Straining through the eyes of telescopes and the electronic ear of the VLA, they search the infinite darkness of the universe for information. What great lengths people will go to searching for a faint message from space when God has spoken so clearly through His Word! But God has not only spoken powerfully to us through the scriptures, He also has a Very Large Ear continuously open to us. He will hear every prayer of His children, even when our prayers are weaker than a snowflake. That's why, of all the Spiritual Disciplines, prayer is second only to the intake of God's Word in importance. -Spiritual Disciplines for the Christian Life

Calendar of Upcoming Events
